## Statement by Management on the annual report

The Board of Directors and the Executive Board have today considered and approved the annual report of Louis Poulsen A/S for the financial year 2021.

The annual report is presented in accordance with the International Financial Reporting Standards as adopted by the EU and additional requirements of the Danish Financial Statement Act.

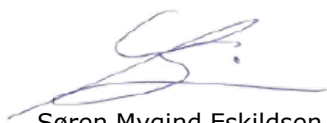

In our opinion, the financial statements give a true and fair view of the Entity's financial position at 31 December 2021 and of the results of its operations and cash flows for the financial year 1 January – 31 December 2021

Further, in our opinion, the Management's review gives a fair review of the development in the Company's activities and financial matters, results for the year, cash flows and financial position as well as a description of material risks and uncertainties that the Company faces.

We recommend the annual report for adoption at the Annual General Meeting.

**To the shareholder of Louis Poulsen A/S****Opinion**

We have audited the consolidated financial statements and the parent Company financial statements of Louis Poulsen A/S for the financial year 1 January – 31 December 2021, which comprise statement of profit and loss, balance sheet, statement of changes in equity, cash flow statement and notes, including accounting policies, for the Group and the Parent Company. The consolidated financial statements and the parent Company financial statements are prepared in accordance with International Financial Reporting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act.

In our opinion, the consolidated financial statements and the parent company financial statements give a true and fair view of the financial position of the Group and the Parent Company at 31 December 2021 and of the results of the Group's and the Parent Company's operations and cash flows for the financial year 1 January – 31 December 2021 in accordance with International Financial Reporting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act.

**Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs) and additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

**Independence**

We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

**Statement on the Management's review**

Management is responsible for the Management's review.

Our opinion on the financial statements does not cover the Management's review, and we do not express any assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the Management's review and, in doing so, consider whether the Management's review is materially inconsistent with the financial statements, or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether the Management's review provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, we conclude that the Management's review is in accordance with the financial statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement of the Management's review.

**Auditor's responsibilities for the audit of the financial statements**

Our objectives are to obtain reasonable assurance as to whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit conducted in accordance with ISAs and additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and contents of the financial statements, including the note disclosures, and whether the financial statements represent the underlying transactions and events in a manner that gives a true and fair view.
- obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

### **Management's responsibilities for the financial statements**

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with International Financial Reporting Standards as adopted by the EU and additional requirements of the Danish Financial Statements Act and for such internal control as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the financial statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

2021, 2020 and 2019 figures are prepared in accordance with IFRS and 2018 and 2017 are prepared in accordance with Danish GAAP. The differences between IFRS and Danish GAAP mainly related to recognition of leasing contracts in accordance with IFRS 16 and reversal of goodwill amortization.

The financial ratios have been calculated as follows:

# Management commentary

Ratios	Calculation formula	Calculation formula reflects
Net margin (%)	$\frac{\text{Profit/loss for the year} \times 100}{\text{Revenue}}$	The entity's operating profitability.
EBITDA ratio (%)	$\frac{\text{EBITDA} \times 100}{\text{Revenue}}$	The entity's profitability before depreciation and amortisation
EBITA ratio (%)	$\frac{\text{EBITA} \times 100}{\text{Revenue}}$	The entity's profitability before amortization
Solvency ratio (%)	$\frac{\text{Equity} \times 100}{\text{Total assets}}$	The financial strength of the entity
Primary ratio (%)	$\frac{\text{EBITA} \times 100}{\text{Average invested capital}}$	The return on invested capital in the entity

Louis Poulsen A/S has local Sales Representation Offices in Spain and France

## Management commentary

### Primary activities

The Louis Poulsen group manufactures and sells lighting fixtures to private consumers and professionals in Denmark and abroad. The group is internationally recognized for providing exclusive lighting fixtures of high quality and functional design. Louis Poulsen is an internationally acclaimed high-end lighting brand. Louis Poulsen build on a strong heritage, and always aspire to exceed expectations in delivering long-lasting design that shapes light for people and spaces. The products primarily serve the upper segments of the professional and private consumer markets that attach great importance to the unique lighting and the high quality levels. Louis Poulsen's products fulfil the most stringent international demands for energy optimization and at the same time they meet the demand for a unique design as well as comfortable and glare free lighting.

### Development in activities and finances

2021 has again been an extraordinary year for the Louis Poulsen group, as it has been for most companies and people all over the world. The uncertainty of the COVID-19 pandemic has been a challenge throughout the year, and many steps have also this year been taken in all Louis Poulsen companies to protect both the workforce, the production and sales. New ways of working have been introduced both in the daily work in the factory but also in the various departments. Digital investments have proven successful in a time where physical meetings are not possible. Production has not stopped during 2021, but has been challenged by lack of components. Sourcing channels was affected both from Asia and Europe. Throughout 2021 we have like in 2020 seen a positive trend on sales, specifically in the business to consumer segment. Consumers in Denmark just as abroad have continued investing in home decoration in, hence we have seen increased sales in the residential market.

The integration activities in Design Holding and its subsidiaries Louis Poulsen, FLOS (Italy), B&B Italia (Italy), Fendi Casa (Italy) and Ydesign (US) has been ongoing in 2021 to secure growth for the group. Cooperation is taking place in many areas such as digital transformation, go-to-market strategies, international opportunities, production and procurement just to mention some. Design Holding has opened D studio, Copenhagen during spring 2021 at Kuglegården in Copenhagen and D studio, Milan during fall 2021.

The consolidated financial statements of the Group have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). For all periods up to and including the year ended 31 December 2019, the Group prepared its financial statements in accordance with local generally accepted accounting principles in Denmark (Danish GAAP). IFRS was adopted for the year ending 31 December 2020 and forward due to financial statements users being to a higher extend from outside of Denmark, including bond holders in the parent company International Design Holding S.p.A. as well as international vendors and customers.

The consolidated revenue amounts to DKK 1.094 million representing a growth of 20% vs. 2020.

Operating profit (EBIT) reached DKK 237 million. The profit of DKK 172 million exceeds both expectations in the announced in 2020 Annual Report and 2020 result. The integration activities and the COVID 19 pandemic as mentioned above has caused one-off costs for a substantial amount. In total integration costs and COVID 19 expenses affects the result by DKK 20,2 million. Management considers the financial development to be satisfactory.

Further information on the financial development for the subsidiaries is available in the annual report pages 11 and forward.

## Management commentary

### Outlook

Louis Poulsen A/S expect an increase in the turnover in 2022 by up to 5-10% followed by a similar increase in capacity costs covering new initiatives. The primary result is expected to increase due to further activities in sales.

Due to the uncertainty in the market the outlook for 2022 is still uncertain. One of the main difficulties for Louis Poulsen is related to supply of components and the increasing prices for components and energy. It is vital for our production in Denmark that there is a constant inflow of spare parts to the factory. The Covid 19 pandemic has caused and is still causing difficulties within supply of components from Asia as well as Europe, and the situation in Ukraine is causing further uncertainty and difficulties in the market.

It is in general an unpredictable market situation also for 2022, which of course leads to uncertainty for the full year expectations on turnover. We see less uncertainty related to the values in our balance sheet.

### Particular risks

#### *Market risks*

The group's products are primarily positioned in the high-end markets. The economic development in the professional and private consumer markets will affect the financial results.

#### *Currency risks*

Due to sales activities in foreign markets, cash flow and net positions are influenced by changes in exchange rates for a number of currencies. It is group policy to cover commercial exchange risks. Hedging is primarily used to cover open foreign exchange positions related to trading activities in the next twelve months based on the budget. The group does not use speculative hedging.

#### *Credit risks*

The group's credit risks relate to trade receivables included in the balance sheet. The group has no vital risks related to a single customer or business partner. The company's credit risk policy involves assessing creditworthiness of all major customers and business partners. This is done on a regular basis.

### Intellectual capital resources

The group has an experienced and highly competent staff working throughout the value chain. The group will continue to implement measures to attract and retain highly skilled staff with expertise in the development of lighting to ensure future growth. Great demand is placed on the employees' technical and craftsman skills and their ability to engage in a logistically demanding production process. The Danish labor market has been highly competitive in 2021, and there is a general increase in demand for talent within most areas, which is expected to continue.

To ensure high product quality and competitive production the group continuously optimizes production. This demands a high level of competence, and the group therefore continuously invests in competency development. It is, however, just as important for Louis Poulsen A/S to attract and retain both skilled and unskilled workers and employees with medium to higher education level.

2021 has been a year of an increased amount of new hires due to both organic growth and replacement of certain positions. Louis Poulsen A/S has recruited competencies within the area of supply chain with focus on production, sourcing, R&D, delivery performance and project management. In order to meet the increased sales, more blue collar workers have been recruited to the factory in Vejen. In addition, the company has welcomed new competencies within sales, marketing, digital and other commercial areas.

## Management commentary

### Research and development activities

Louis Poulsen continuously invests in development, updates and improvements of its product portfolio. Costs related to development of products are expensed in the income statement, or accounted for as an asset following the accounting policies.

### Group relations

The consolidated financial statements comprise the parent company Louis Poulsen A/S and its subsidiaries being incorporated in the annual report of Louis Poulsen A/S. The consolidated accounts include profit and loss for all subsidiaries.

Louis Poulsen's sales organization is based in Copenhagen, and the company's production facilities are based in Vejen. The daily management is carried out from Denmark in close cooperation with our owners.

Sales and distribution outside Denmark are carried out through the 10 subsidiaries or through agents and distributors operating on behalf of Louis Poulsen A/S.

The Louis Poulsen group had 528 employees as of 31 December 2021, including 145 being employed in the subsidiaries abroad. The majority of the Danish employees are engaged in the company's production in Vejen.

Development in staff:	Denmark	Subsidiaries
Number of employees beginning of 2021	332	132
Recruited during 2021	178	25
Leavers during 2021	-127	-12
Number of employees end of 2021	383	145

### Statutory report on corporate social responsibility

#### *Business model*

Louis Poulsen is a proud Danish manufacturer of premium lighting solutions. Our philosophy is deeply rooted in the Scandinavian design tradition where form follows function. Since our founding we have sought, not only to design lamps, but to shape light.

The Louis Poulsen group is internationally recognized for providing our customers with exclusive lighting solutions of high quality and functional design. Our products are sold to both private consumers and professionals in Denmark and abroad. With our unique lighting and high quality, we serve the upper segments of both markets. All our products meet the demand for a unique design as well as comfortable and glare free lighting while fulfilling international demands for energy optimization.

## Management commentary

Our aim is to improve quality of life by providing functional products that make people feel good, both in- and outdoors. Sustainability in terms of long-lasting products has always been a cornerstone of our business. Since our founding in 1874, timelessness has been a key element in our design philosophy. Our products are long-lasting in the sense of durability and design. We believe that the best designs are the ones that can withstand the test of time. Creating long-lasting products and extending products life-time is also a way of decreasing the environmental footprint.

We believe that making business in a manner that respects people and environment is the source of long-term value creation and sustainable economic growth. Being a responsible company entails managing the impact we have towards all our stakeholders. The passion and creativity of our employees are the heart of our company and we want to ensure that Louis Poulsen is an engaging and safe place to work.

For the statutory reporting on corporate sustainability, see the 2021 Annual Sustainability Report. The report is available on the following link:

<https://www.louispoulsen.com/da-dk/baredygtighedsrapporter>

### Statutory report on the underrepresented gender

Louis Poulsen A/S wants to give equal access to leadership positions for members of both genders.

Throughout the company the total distribution of women is 56,83% and for men 43,17%. Hence the gender distribution is very even in Louis Poulsen.

The share of women in leadership positions with staff responsibility represented 28% as of end of 2020. This share was 32% by the end of 2021. The company wishes to increase the share of women in leadership positions. To facilitate this development a recruitment policy has been implemented in relation to leadership positions according to which at least one female applicant must be admitted to job interview assuming qualified female applicants are available.

Through this policy and an ongoing focus on development of employees at all levels of the organization irrespective of age and gender, Louis Poulsen wishes to contribute to the education and development of potential female managers and board members.

Target figure for the share of the under-represented gender in the Board of Directors:

We strive to reach equal gender representation on the board. Currently the Board of Directors consists of 20% women and 80% men. By 2025 the goal is to have 40% women representation on the board, and to constantly seek candidates with both relevant competencies and experience. Relevant knowledge and professional experience are key parameters when nominating new board members. In 2021 there were no relevant female candidates for the board.

### Events after the balance sheet date

Despite the current situation in Ukraine, no event has occurred after the balance sheet date to this date, which may materially affect the assessment of the Company's financial position.

## Notes to consolidated financial statements

### Impairment of goodwill

In the impairment test, the recoverable amount was compared with the carrying amount. The recoverable amount is based on a calculation of the value in use using cash flow estimates based on the budget for 2022 and expectations for the next 4 years. The long-term growth rate in the terminal period has been set to 1,75% so that it equals. The expected long-term rate of inflation 2021 has shown no indication of impairment.

In the impairment test a discount rate of 8,8% was used for 2021.

Likely changes in key assumptions is not expected to result in a impairment at 31 December.

### Development projects

Development projects in progress comprise ongoing development of new lighting fixtures that have not yet been completed.

The cost of development projects comprises costs such as salaries, amortisation and indirect costs.

New lighting fixtures are developed for the domestic market as well as markets abroad. The development projects are regularly evaluated by management. In the evaluation the management evaluates the progress of the projects and the future market for the lighting fixtures.

### 14. Trade Receivables

The group's credit risks relate to trade receivables included in the balance sheet. The group has no vital risks related to a single customer or business partner. The company's credit risk policy involves assessing creditworthiness of all major customers and business partners. This is done on a regular basis.

At December 31, 2021, trade receivables total DKK 63 million net of the bad debt provision which amounts to DKK 1 million.

The following table shows the breakdown by geographic areas of the amount of trade receivables, including the breakdown by geographic areas of the amount of the provision for write-down:

	2021	2020
	DKK'm	DKK'm
Denmark	22	25
EEC	22	19
Non-EEC	19	13
<b>Total Trade Receivables</b>	<b>63</b>	<b>57</b>

The changes in the provision for impairment of receivables are summarised below:

Provision for impairment of receivables	2021	2020
	DKK'm	DKK'm
<b>Balance as of January 1</b>	<b>-2</b>	<b>-1</b>
Usage of Provision	1	0

<b>Non-current financial lease liability</b>		<b>102</b>	<b>49</b>

## Notes to consolidated financial statements

### 17. Financial risk management

#### Market risk

The group's products are primarily positioned in the high-end markets. The economic development in the professional and private consumer markets will affect the financial results.

#### Currency risk

Due to sales activities in foreign markets, cash flow and net positions are influenced by changes in exchange rates for a number of currencies. Louis Poulsen A/S has entered into forward exchange contracts for the following 12 months to secure sales and cost of goods sold in the following currencies JPY 723 million, NOK 43 million, SEK 94 million and CNY 52 million. All contracts are subscribed with the company's bank. Currency risk between DKK and EUR is not covered due to the Danish Government's fixed currency rate policy.

It is group policy to cover commercial exchange risks. Hedging is primarily used to cover open foreign exchange positions related to trading activities in the next twelve months based on the budget. Where the budgeted quarterly netposition is above DKK 3 million, 80% for the netposition is hedged.

The group does not use speculative hedging.

## Notes to consolidated financial statements

### 17. Financial risk management

#### Interest rate risk

Louis Poulsen has no external interest-bearing debt and therefore no interest rate risk. Right of use liabilities are fixed and not influenced by interest rates.

#### Credit risk

The group's credit risks relate to trade receivables included in the balance sheet. The group has no vital risks related to a single customer or business partner. The company's credit risk policy involves assessing creditworthiness of all major customers and business partners. This is done on a regular basis.

#### Liquidity risk

Louis Poulsen has focus on liquidity. Liquidity is budgetted each year and weekly follow up on deviations. At year end the company has a DKK 113 million positive cash-flow position.

	<b>Less than 1 year DKK'm</b>	<b>Between 1 - 5 years DKK'm</b>	<b>After 5 years DKK'm</b>
<b>2020</b>			
Trade payables	108	0	0
Lease liabilities	18	26	24

Lease liabilities	11	42	54
Trade payables from group	0	0	0
Other payables	121	0	0
	<b>291</b>	<b>42</b>	<b>54</b>

There is no difference between the nominal amount and booked value.

## Notes to consolidated financial statements

### 17. Financial risk management

#### Derivatives

Louis Poulsen uses foreign currency swaps to hedge its exposure against fluctuations in foreign currency prices.

	<b>Assets</b>	<b>Liabilities</b>	<b>Hedge reserve</b>
<b>2020</b>			
Foreign currency swap	<u>0</u>	<u>0</u>	<u>0</u>
<b>2021</b>			
Foreign currency swap	<u>2</u>	<u>0</u>	<u>2</u>

The fair value at 31 December 2021 and 2020 was measured in accordance with level 2 in the fair value hierarchy (IFRS 13). Level 2 is based on non-quoted prices, observable either directly or indirectly. Prices from third party specialists are used to quote the prices for unrealised derivative financial instruments.

The value of the financial instruments recognised in other comprehensive income will be re-cycled from equity to profit & loss at the time the underlying cash flows from the hedging item is recognised in profit & loss i.e. within 12 months. All derivatives are also presented as short term on the balance sheet as maturity is within 12 months.

<b>Deferred tax assets</b>	<b>39</b>	<b>39</b>		

### 19. Other provision

Other provisions mainly consist of provisions regarding pension accrual to employer pension in Germany amounting to DKK 12 million. Pension plans in Germany relates to approx. 60 former employees' defined benefit pension plans ending in 1999. The plan is governed by the employment laws of Germany. The level of benefits provided depends on the member's and the employer's annual contributions and the annuity factor at retirement age.

The latest actuarial assessments of liabilities and assets have been made in 2021. The present value of the scheme's liabilities have been assessed using the Projected Unit Credit Method. The actuarial gain during the year amounts to DKK 1,0 million. Remaining pension plans are defined contribution pension plans, that are settle on a ongoing basis in accordance with local laws and regulations.

## Notes to consolidated financial statements

Louis Poulsen A/S is in a Danish joint taxation arrangement in which Luminous Designs Investments ApS serves as the administration company. According to the joint taxation provisions of the Danish Corporation Tax Act, the Entity is therefore liable for income taxes etc for the jointly taxed entities, and for obligations, if any, relating to the withholding of tax on interest, royalties and dividend for the jointly taxed entities. The total known net liability of the jointly taxed entities under the joint taxation arrangement is evident from the administration company's financial statements.

The Company is guarantor in a joint Revolver Facility Agreement amounting up to EUR 100 million, together with the parent company International Design Groups Holding S.p.A and its other subsidiaries. The Company has irrevocably and unconditionally jointly given guarantees to the lenders, agents etc. of the Revolver Facility Agreement.

## Notes to consolidated financial statements

### 27. New accounting regulations

The IASB has issued a number of new standards and amendments not yet in effect or adopted by the EU and therefore not relevant for the preparation of the 2021 consolidated financial statements.

Louis Poulsen A/S expects to implement these standards when they take effect.

None of the new standards issued are currently expected to have any significant impact on the Group's financial statements when implemented.

## Notes to parent financial statements

### Impairment of goodwill

In the impairment test, the recoverable amount was compared with the carrying amount. The recoverable amount is based on a calculation of the value in use using cash flow estimates based on the budget for 2022 and expectations for the next 4 years. The long-term growth rate in the terminal period has been set so that it equals. The impairment test for 2020 and 2021 has shown no indication of the expected long-term rate of inflation.

In the impairment test a discount rate of 8% was used for 2021 and 8% for 2020.

Furthermore, the growth rate in the terminal period was 8,7% for 2021 and 8,4% for 2020.

### Development projects

Development projects in progress comprise ongoing development of new lighting fixtures that have not yet been completed.

The cost of development projects comprises costs such as salaries, amortisation and indirect costs.

New lighting fixtures are developed for the domestic market as well as markets abroad. The development projects are regularly evaluated by management. In the evaluation the management evaluates the progress of the projects and the future market for the lighting fixtures.

<b>Deferred tax expense/(benefit)</b>			<b>-2</b>	<b>0</b>
<b>Deferred tax assets</b>	<b>0</b>	<b>2</b>		

### 15. Trade Receivables

The group's credit risks relate to trade receivables included in the balance sheet. The group has no vital risks related to a single customer or business partner. The company's credit risk policy involves assessing creditworthiness of all major customers and business partners. This is done on a regular basis.

At December 31, 2021, trade receivables total DKK 22 million net of the bad debt provision which amounts to DKK 0 million.

## Notes to parent financial statements

### 15. Trade Receivables

The following table shows the breakdown by geographic areas of the amount of trade receivables, including the breakdown by geographic areas of the amount of the provision for write-down:

	2021 DKK'm	2020 DKK'm
Domestic	14	22
Abroad	8	3
<b>Total Trade Receivables</b>	<b>22</b>	<b>25</b>

The changes in the provision for impairment of receivables are summarised below:

#### Provision for impairment of receivables

	2021 DKK'm	2020 DKK'm
<b>Balance as of January 1, 2021</b>	<b>-1</b>	<b>0</b>
Usage of Provision	1	0
Allocation to Provision	0	-1
Exchange rate difference	0	0
<b>Balance as of December 31, 2021</b>	<b>0</b>	<b>-1</b>

Trade receivables, amounting to DKK 22 million, are broken down by maturity, without taking into account the Provision for Impairment of Receivables of DKK 0 million and Bad debts in litigation:

2021	Total as of December	Current	Overdue 0-30	Overdue 30-60	Overdue 60-90	Past due more than
Domestic	14	9	4	0	0	1
Abroad	8	7	1	0	0	0
<b>Total Trade Receivables</b>	<b>22</b>	<b>16</b>	<b>5</b>	<b>0</b>	<b>0</b>	<b>1</b>

2020	Total as of December	Current	Overdue 0-30	Overdue 30-60	Overdue 60-90	Past due more than
Domestic	23	18	4	1	0	0
Abroad	3	2	1	0	0	0

<b>Deffered tax assets</b>	<b>39</b>	<b>39</b>		

## 17. Financial risk management

### Market risk

The group's products are primarily positioned in the high-end markets. The economic development in the professional and private consumer markets will affect the financial results.

### Currency risk

Due to sales activities in foreign markets, cash flow and net positions are influenced by changes in exchange rates for a number of currencies. Louis Poulsen A/S has entered into forward exchange contracts for the following 12 months to secure sales and cost of goods sold in the following currencies JPY 723 million, NOK 43 million, SEK 94 million and CNY 52 million. All contracts are subscribed with the company's bank. Currency risk between DKK and EUR is not covered due to the Danish Government's fixed currency rate policy.

It is group policy to cover commercial exchange risks. Hedging is primarily used to cover open foreign exchange positions related to trading activities in the next twelve months based on the budget. Where the budgetted quarterly netposition is above DKK 3 million, 80% for the netposition is hedged.

The group does not use speculative hedging.

## Notes to parent financial statements

### 17. Financial risk management

#### Interest rate risk

Louis Poulsen has no external interest-bearing debt and therefore no interest rate risk. Right of use liabilities are fixed and not influenced by interest rates.

#### Credit risk

The group's credit risks relate to trade receivables included in the balance sheet. The group has no vital risks related to a single customer or business partner. The company's credit risk policy involves assessing creditworthiness of all major customers and business partners. This is done on a regular basis.

#### Liquidity risk

Louis Poulsen has focus on liquidity. Liquidity is budgetted each year and weekly follow up on deviations. At year end the company has a DKK 60 million positive cash-flow position.

	<b>Less than 1 year DKK'm</b>	<b>Between 1 - 5 years DKK'm</b>	<b>After 5 years DKK'm</b>

	<u>205</u>	<u>32</u>	<u>49</u>

## Notes to parent financial statements

### 17. Financial risk management

#### Derivatives

Louis Poulsen uses foreign currency swaps to hedge its exposure against fluctuations in foreign currency prices.

	Assets	Liabilities	Hedge reserve
2020			
Foreign currency swap	<u>0</u>	<u>0</u>	<u>0</u>
2021			
Foreign currency swap	<u>2</u>	<u>0</u>	<u>2</u>

The fair value at 31 December 2021 and 2020 was measured in accordance with level 2 in the fair value hierarchy (IFRS 13). Level 2 is based on non-quoted prices, observable either directly or indirectly. Prices from third party specialists are used to quote the prices for unrealised derivative financial instruments.

The value of the financial instruments recognised in other comprehensive income will be re-cycled from equity to profit & loss at the time the underlying cash flows from the hedging item is recognised in profit & loss i.e. within 12 months. All derivatives are also presented as short term on the balance sheet as maturity is within 12 months.

Louis Poulsen A/S is in a Danish joint taxation arrangement in which Luminous Designs Investments ApS serves as the administration company. According to the joint taxation provisions of the Danish Corporation Tax Act, the Entity is therefore liable for income taxes etc for the jointly taxed entities, and for obligations, if any, relating to the withholding of tax on interest, royalties and dividend for the jointly taxed entities. The total known net liability of the jointly taxed entities under the joint taxation arrangement is evident from the administration company's financial statements.

The Company is guarantor in a joint Revolver Facility Agreement amounting up to EUR 100 million, together with the parent company International Design Groups Holding S.p.A and its other subsidiaries. The Company has irrevocably and unconditionally jointly given guarantees to the lenders, agents etc. of the Revolver Facility Agreement.

Louis Poulsen UK Limited (company no. 01895479) is exempt from the requirements of the Companies Act 2006 relating to the audit of accounts under section 479A of the Companies Act 2006.

## Accounting policies

### Reporting class

This Annual Report has been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the EU as well as additional Danish disclosure requirements applying to large reporting class C entities. Further they are prepared in accordance with FIRS as issued by the International Accounting Standards Board ("IASB").

The preparation of these financial statements in conformity with IFRS requires management to exercise its judgement in the process of applying the Company's accounting policies. It also requires the use of certain critical accounting estimates and assumptions. Areas involving a higher degree of judgement or complexity, or areas where estimates and assumptions are significant to the financial statements are further described on page 58 of this document for both the consolidated and parent company.

The accounting policies applied to these consolidated financial statements and parent financial statements are consistent with those applied last year.

"The financial statements are presented in Danish kroner and all values are rounded to the nearest million (DKK'm), except when otherwise indicated."

### Recognition and measurement

Assets are recognised in the balance sheet when it is probable as a result of a prior event that future economic benefits will flow to the Entity, and the value of the asset can be measured reliably.

Liabilities are recognised in the balance sheet when the Entity has a legal or constructive obligation as a result of a prior event, and it is probable that future economic benefits will flow out of the Entity, and the value of the liability can be measured reliably.

On initial recognition, assets and liabilities are measured at cost. Measurement subsequent to initial recognition is effected as described below for each financial statement item.

Anticipated risks and losses that arise before the time of presentation of the annual report and that confirm or invalidate affairs and conditions existing at the balance sheet date are considered at recognition and measurement.

Income is recognised in the income statement when earned, whereas costs are recognised by the amounts attributable to this financial year.

### Functional and presentation currency

The consolidated financial statements are presented in Danish kroner, DKK, which is also the functional currency of the Parent Company. Each subsidiary determines its own functional currency, and items recognised in the financial statements of each entity are measured using that functional currency.

### Consolidated financial statements

The consolidated financial statements comprise the Parent and the group enterprises (subsidiaries) that are controlled by the Parent. Control is achieved by the Parent, either directly or indirectly, holding more than 50% of the voting rights or in any other way possibly or actually exercising controlling influence.

## Accounting policies

### Basis of consolidation

The consolidated financial statements are prepared on the basis of the financial statements of the Parent and its subsidiaries. The consolidated financial statements are prepared by combining uniform items. On consolidation, intra-group income and expenses, intra-group accounts and dividends as well as profits and losses on transactions between the consolidated enterprises are eliminated. The financial statements used for consolidation have been prepared applying the Group's accounting policies.

Subsidiaries' financial statement items are recognised in full in the consolidated financial statements.

Investments in subsidiaries are offset at the pro rata share of such subsidiaries' net assets at the acquisition date, with net assets having been calculated at fair value.

### Foreign currency translation

On initial recognition, foreign currency transactions are translated applying the exchange rate at the transaction date. Receivables, payables and other monetary items denominated in foreign currencies that have not been settled at the balance sheet date are translated using the exchange rate at the balance sheet date. Exchange differences that arise between the rate at the transaction date and the rate in effect at the payment date, or the rate at the balance sheet date are recognised in the income statement as financial income or financial expenses. Property, plant and equipment, intangible assets, inventories and other non-monetary assets that have been purchased in foreign currencies are translated using historical rates.

When recognising foreign subsidiaries and associates that are independent entities, the income statements are translated at average exchange rates for the months that do not significantly deviate from the rates at the transaction date. Balance sheet items are translated using the exchange rates at the balance sheet date.

Goodwill is considered belonging to the independent foreign entity and is translated using the exchange rate at the balance sheet date. Exchange differences arising out of the translation of foreign subsidiaries' equity at the beginning of the year at the balance sheet date exchange rates as well as out of the translation of income statements from average rates to the exchange rates at the balance sheet date are recognised directly in equity.

Exchange adjustments of outstanding accounts with independent foreign subsidiaries which are considered part of the total investment in the subsidiary in question are classified directly as equity.

When recognising foreign subsidiaries that are integral entities, monetary assets and liabilities are translated using the exchange rates at the balance sheet date. Non-monetary assets and liabilities are translated at the exchange rate of the time of acquisition or the time of any subsequent revaluation or write-down. The items of the income statement are translated at the average rates of the months; however, items deriving from non-monetary assets and liabilities are translated using the historical rates applicable to the relevant non-monetary items.

### Derivative financial instruments

On initial recognition in the balance sheet, derivative financial instruments are measured at cost and subsequently at fair value. Derivative financial instruments are recognised under other receivables or other payables.

Changes in the fair value of derivative financial instruments classified as and complying with the requirements for hedging the fair value of a recognised asset or a recognised liability are recorded in the income statement together with changes in the value of the hedged asset or the hedged liability.

## Accounting policies

Changes in the fair value of derivative financial instruments classified as and complying with the requirements for hedging future transactions are recognised directly in equity. When the hedged transactions are realised, the accumulated changes are recognised as part of cost of the relevant financial statement items.

For derivative financial instruments that do not comply with the requirements for being treated as hedging instruments, changes in fair value are recognised currently in the income statement as financial income or financial expenses.

Changes in the fair value of derivative financial instruments applied for hedging net investments in independent foreign subsidiaries or associates are classified directly as equity.

### Income statement

#### Revenue

Revenue from the sale of manufactured goods and goods for resale is recognised in the income statement when delivery is made and risk has passed to the buyer. Revenue from the sale of services is recognised in the income statement when delivery is made to the buyer. Revenue is recognised net of VAT, duties and sales discounts and is measured at fair value of the consideration fixed.

#### Production costs

Production costs comprise expenses incurred to earn revenue for the financial year. Production costs comprise direct and indirect costs for raw materials and consumables, wages and salaries, rent and lease as well as amortisation, depreciation and impairment losses relating to intangible assets and property, plant and equipment included in the production process. In addition, the item includes ordinary write-down of inventories.

#### Distribution costs

Distribution costs comprise costs incurred for sale and distribution of the Entity's products, including wages and salaries for sales staff, advertising costs, travelling and entertainment expenses, etc as well as amortisation, depreciation and impairment losses relating to intangible assets and property, plant and equipment attached to the distribution process.

#### Administrative expenses

Administrative expenses comprise costs incurred for the Entity's administrative functions, including wages and salaries for administrative staff and Management, stationery and office supplies as well as amortisation, depreciation and impairment losses relating to intangible assets and property, plant and equipment used for administration of the Entity.

#### Income from investments in group enterprises

Income from investments in group enterprises comprises the pro rata share of the individual enterprises' profit/loss after full elimination of internal profits or losses.

#### Other financial income

Other financial income comprises dividends etc received on other investments, interest income, including interest income on receivables from group enterprises, net capital gains on securities, payables and transactions in foreign currencies, amortisation of financial assets as well as tax relief under the Danish Tax Prepayment Scheme etc.

#### Other financial expenses

Other financial expenses comprise interest expenses, including interest expenses on payables to group enterprises, net capital losses on securities, payables and transactions in foreign currencies, amortisation of financial liabilities as well as tax surcharge under the Danish Tax Prepayment Scheme etc.

## Accounting policies

### Tax on profit/loss for the year

Tax for the year, which consists of current tax for the year and changes in deferred tax, is recognised in the income statement by the portion attributable to the profit for the year and recognised directly in equity by the portion attributable to entries directly in equity.

The Entity is jointly taxed with its ultimate owner and all Danish subsidiaries. The current Danish income tax is allocated among the jointly taxed entities proportionally to their taxable income (full allocation with a refund concerning tax losses).

### Balance sheet

#### Goodwill

Goodwill is the positive difference between cost and value in use of assets and liabilities taken over as part of the acquisition. Goodwill is amortised straight-line over its estimated useful life which is fixed based on the experience gained by Management for each business area. Useful life is determined based on an assessment of whether the enterprises are strategically acquired enterprises with a strong market position and a long-term earnings profile and whether the amount of goodwill includes intangible resources of a temporary nature that cannot be separated and recognised as separate assets. Useful lives are reassessed on an annual basis. The amortisation periods used are 20 years.

Goodwill is written down to the lower of recoverable amount and carrying amount.

#### Intellectual property rights etc

Intellectual property rights etc comprise development projects completed and in progress with related intellectual property rights, acquired intellectual property rights and prepayments for intangible assets.

Development projects on clearly defined and identifiable products and processes, for which the technical rate of utilisation, adequate resources and a potential future market or development opportunity in the enterprise can be established, and where the intention is to manufacture, market or apply the product or process in question, are recognised as intangible assets. Other development costs are recognised as costs in the income statement as incurred. When recognising development projects as intangible assets, an amount equalling the costs incurred is taken to equity under Reserve for development costs that is reduced as the development projects are amortised and written down.

The cost of development projects comprises costs such as salaries and amortisation that are directly and indirectly attributable to the development projects.

Indirect production costs in the form of indirectly attributable staff costs and amortisation of intangible assets and depreciation on property, plant and equipment used in the development process are recognised in cost based on time spent on each project.

Completed development projects are amortised on a straight-line basis using their estimated useful lives which are determined based on a specific assessment of each development project. If the useful life cannot be estimated reliably, it is fixed at 10 years. For development projects, protected by intellectual property rights, the maximum amortisation period is the remaining duration of the relevant rights. The amortisation periods used are 5 years.

Intellectual property rights acquired are measured at cost less accumulated amortisation. Patents are amortised over their remaining duration, and licences are amortised over the term of the agreement, but over no more than 20 years.

## Accounting policies

Intellectual property rights etc are written down to the lower of recoverable amount and carrying amount.

### Leases

Leased assets and lease commitments are recognised in the balance sheet when the leased asset under a lease entered into regarding a specific identifiable asset is made available to the Group in the lease term, and when the Group obtains the right to almost all economic benefits from the use of the identified asset and the right to control the use of the identified asset.

On initial recognition, lease commitments are measured at the present value of the future lease payments discounted by an incremental borrowing rate. The following lease payments are recognised as part of the lease commitment:

- Fixed payments.
- Variable payments that change concurrently with changes to an index and an interest rate based on said index or interest rate.
- Payments overdue subject to a residual value guarantee.
- Exercise price of call options that it is highly probable that Management will exercise.
- Payments subject to an extension option that it is highly probable that the Group will exercise.
- Penalty related to a termination option unless it is highly probable that the Group will not exercise the option.

The lease commitment is measured at amortised cost according to the effective interest method. The lease commitment is recalculated when the underlying contractual cash flows change due to changes in an index or an interest rate if the Group's estimate of a residual value guarantee changes or if the Group changes its assessment of whether call options, extension options or termination options can reasonably be expected to be exercised.

On initial recognition, the leased asset is measured at cost, corresponding to the value of the lease commitment adjusted for prepaid lease payments plus directly related costs and estimated costs for demolition, repairs or the like and less discounts or other types of incentive payments received from the lessor.

Subsequently, the asset is measured at cost less accumulated depreciation and impairment losses. The leased asset is depreciated over the shorter of the lease term and the useful life of the leased asset. Depreciation charges are recognised on a straight-line basis in the income statement.

The leased asset is adjusted for changes to the lease commitment due to changes to the terms of the lease or changes to the cash flows of the lease concurrently with changes to an index or an interest rate.

Leased assets are depreciated on a straight-line basis over the expected lease term, which is:

Cars	1-4 years
Office supply	3 years
Properties over lease term	1-15 years

The Group presents the leased asset and the lease commitment separately in the balance sheet.

The Group has chosen not to recognise leased assets of a low value and short-term leases in the balance sheet. Instead, related lease payments are recognised on a straight-line basis in the income statement.

## Accounting policies

### Property, plant and equipment

Plant and machinery as well as other fixtures and fittings, tools and equipment are measured at cost less accumulated depreciation and impairment losses.

Cost comprises the acquisition price, costs directly attributable to the acquisition and preparation costs of the asset until the time when it is ready to be put into operation.

The basis of depreciation is cost less estimated residual value after the end of useful life. Straight-line depreciation is made on the basis of the following estimated useful lives of the assets:

Plant and machinery	5 years
Other fixtures and fittings, tools and equipment	2-5 years
Leasehold improvements	5-14 years

For leasehold improvements and assets subject to finance leases, the depreciation period cannot exceed the contract period.

Estimated useful lives and residual values are reassessed annually.

Items of property, plant and equipment are written down to the lower of recoverable amount and carrying amount.

### Investments in group enterprises

Investment in subsidiaries are measured at cost. If cost exceeds the recoverable amount, a write-down is made to this lower value

### Receivables

Receivables are measured at amortised cost, usually equalling nominal value less writedowns for bad and doubtful debts.

### Inventories

Inventories are measured at the lower of cost using the FIFO method and net realisable value.

Cost consists of purchase price plus delivery costs. Cost of manufactured goods and work in progress consists of costs of raw materials, consumables, direct labour costs and indirect production costs.

Indirect production costs comprise indirect materials and labour costs, costs of maintenance of, depreciation of and impairment losses relating to machinery, factory buildings and equipment used in the manufacturing process as well as costs of factory administration and management. Financing costs are not included in cost.

The net realisable value of inventories is calculated as the estimated selling price less completion costs and costs incurred to execute sale.

## Accounting policies

### Inventory obsolescence

In general the majority of the products are evergreens. Finish goods are very rarely sold at prices lower than production prices. Risk on inventories more relates to raw materials or semi finished goods where either quantities are too high compared to consumptions or goods are related to discontinued products.

Procedures and policies are in place to identify and write down on goods, where costs exceeds net realisable value.

### Prepayments

Prepayments comprise incurred costs relating to subsequent financial years. Prepayments are measured at cost.

### Cash

Cash comprises cash in hand and bank deposits.

### Deferred tax

Deferred tax is recognised on all temporary differences between the carrying amount and tax-based value of assets and liabilities, for which the tax-based value of assets is calculated based on the planned use of each asset.

Deferred tax assets, including the tax base of tax loss carryforwards, are recognised in the balance sheet at their estimated realisable value, either as a set-off against deferred tax liabilities or as net tax assets.

### Other provisions

Other provisions comprise anticipated costs of non-recourse guarantee commitments, returns, loss on contract work in progress, decided and published restructuring, etc.

Other provisions are recognised and measured as the best estimate of the expenses required to settle the liabilities at the balance sheet date. Provisions that are estimated to mature more than one year after the balance sheet date are measured at their discounted value.

### Operating leases

Lease payments on operating leases are recognised on a straight-line basis in the income statement over the term of the lease.

### Other financial liabilities

Other financial liabilities are measured at amortised cost, which usually corresponds to nominal value.

### Cash flow statement

The cash flow statement shows cash flows from operating, investing and financing activities as well as cash and cash equivalents at the beginning and the end of the financial year.

Cash flows from operating activities are presented using the indirect method and calculated as the operating profit/loss adjusted for non-cash operating items, working capital changes and income taxes paid.

## Accounting policies

Cash flows from investing activities comprise payments in connection with acquisition and divestment of enterprises, activities and fixed asset investments as well as purchase, development, improvement and sale, etc of intangible assets and property, plant and equipment, including acquisition of assets held under finance leases.

Cash flows from financing activities comprise changes in the size or composition of the contributed capital and related costs as well as the raising of loans, inception of finance leases, instalments on interest-bearing debt, purchase of treasury shares and payment of dividend.

Cash and cash equivalents comprise cash and short-term securities with an insignificant price risk less short-term bank loans.

### Significant accounting judgements, estimates and assumptions

#### Leases – Estimating the incremental borrowing rate and lease term

The Company cannot readily determine the implicit borrowing rate, therefore it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the Company would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of similar value to the right-to-use asset in a similar economic environment. The IBR therefore reflects what the Company “would have to pay”, which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the leases. The Company estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates (such as the Company’s stand-alone credit rating).

#### Impairment of goodwill

In accordance with IAS 36, Goodwill is not subject to amortisation and it is instead tested for impairment at least once a year.

For impairment test purposes Louis Poulsen is considered as one single Cash Generating Unit.

The recoverable amount has been determined based on the calculation of value in use. In which the projections of the cash flows were those assumptions made in the initial business plan.

The calculation of the value in use in particular sensitive to the following assumptions:

- Revenue trends
- Marginality
- discount rate
- growth rates

Please refer to note 8 of the consolidated financial statements.
